FOREWARD. THIS IS number 6. Yes, for the sixth time, AK is conducting the ANA Convention Auction Sale.

FOR THIS EXPRESSION of confidence, I am most grateful.

I APPRECIATE, too, the help of so many of the Committee men. So to Earl Whitehead, our general chairman, and through him to the many who helped, my sincere thanks.

HAD QUITE A HAND in my office, too. Mike Kliman doing a lot of the dirty work—the time-consuming details.

AND CLAIRE, my girl Friday, pounding away at the IBM to keep the production line moving.

TYPOGRAPHER RALPH WOOLMAN and Printer Bill Connolly did such Yoeman service fighting clock and calendar to get the job out on time.

FIFTY-EIGHT CONSIGNORS for the '58 Auction must be a record of some kind. Thanks to each and every one of you.

FOR HIS SPECIAL effort to get the Pattern Material to me on time, thanks to Dr. J. Hewitt Judd.

C'MON to L. A. and have a real Festival of Coins. In addition to the Auction Sale, we will have an exhibit that will be most worthwhile—and the dealers are coming to show their wares.

C'MON TO L.A. and have a real vacation. Our Committees have planned a Festival of fun and sights to see.

NOW ABOUT THE SALE. It starts Wednesday nite at 7 P.M.

THURSDAY at 1 P.M. for the second session.

FRIDAY at 7 P.M. for the third session. We hope we can wind it up but if necessary, arrangements have been made to sell the last 200 lots or so on Saturday at 1 P.M. Depends on how fast we move Friday.

MAIL ORDER SECTION for everybody, whether you attend the convention or not. Get your BID SHEET to me before the close of business on Tuesday, August 19th.

PUBLIC SESSIONS ALSO for everybody. If you can, come. If you can't attend in person, your BID SHEET will represent you. Get it to me early.

LUCKY 1856 CENT—starts off the sale followed by a lovely type collection of U. S. Coins.

MINT ERRORS—really errors, and some swell Paper Money. CANADA, CHARLOTTE, Dahlonaga, Gold and then . . . THAT FRACTIONAL CURRENCY Collection we made so much of a fuss about. Justified, you will agree.

SPECIAL LIBRARY EDITION of Fractional Currency will be prepared with priced realized printed in next to each lot. Handsomely bound with your name in gold letters. Advance Subscriptions only at about \$7.50. Mark your bid sheet.

PROOFS by the piece, proofs by the year, proofs by the series. A feast of coins.

PATTERNS by the hundreds. RARITIES, Common coins—I tried to give you a real ANA Auction Sale. I hope you like it.

A. (Your-convention-auctioneer) K.

CHOICE U.S. TYPE COINS

(The following consignment is from a Midwestern Collector of discriminating taste. In addition to the particularly lovely coins, this group offers an interesting tangent towards intelligent collecting. The cataloguer has been preaching this doctrine for a number of years and is delighted with this opportunity to present a splendid Type Collection which includes Patterns and Trial Pieces in such an order that the whole is a picture, not only of the different types of coins which were adopted for use, but also of the various types which were simply proposed but not adopted. It seems to me that here is a more complete story of each series than is presented by the listing of the regular coinage alone.)

The idea is introduced here and the present offering could have included many more varieties—but the plan is evident and we hope it excites you to act similarly.)

1916 PATTERN MERCURY DIME

- 74—Dime 1916. Unlisted Pattern for the Mercury Dime. Very similar to the regular dies but entirely different in execution. The top of Liberty's cap lies flatter and closer to the head; the wing feathers are more clearly defined. Liberty's representation is generally more pleasing than upon the regular coins. This rarity was out of the Waldo Newcomer Collection, then to Wayte Raymond. It differs from the two 1916 dime patterns in the mint collection as well as the one ex-Farouk, now in the Bareford Collection. Presumably each of the four known patterns are unique items.

- 80—1875 J1357. (AW1442). Liberty at Seashore: regular reverse design. Silver, proof. 57.50
- 81—1875 J1361. (AW1446). Same obverse 20 CENTS in wreath. Silver, proof. 67.50

SET—LINCOLN CENTS

242—1909 to 1950 all dates and mints (except 1923-S, 1924-S and D). This is, without a doubt, one of the finest sets I have ever seen. It's worth a handsome premium—well above market. I have a feeling discriminating collectors will vie for this popular set.

SET—3 CENTS NICKEL

243—Set 1865-1889 except 1877 and 1887 over 6. All 24 are brilliant proof, premium coins, worth \$575.00
--

SET—3 CENTS SILVER

244—Set 1851-1873 except 1857 and 1858. The 1851 to 1855 group includes the 1851-O and all of the pieces are uncirculated. From 1856 to 1873 all are brilliant proofs and choice. The 1856 is, of course, particularly scarce in proof condition. Curiously, the 3 cents silver pieces are among the less frequently offered coins. It is difficult indeed to acquire such choice specimens today. \$750.00

SET—LIBERTY HEAD NICKELS

245—1883-1912 Complete, uncirculated. In my opinion, the set of uncirculated Liberty Heads is more difficult to assemble than the corresponding proofs. Except for the 1912, all are choice—including the 1912-D and S mints. Worth \$600.00

SET—WASHINGTON QUARTERS

246—1932-1952 inclusive, in 3 black plastic holders, all uncirculated. \$265.00

SET—FRANKLIN HALVES

247—1948-1952 inclusive, 13 pieces, uncirculated. \$.....

SET—PEACE DOLLARS

248—Complete set 1921-1935, all dates and mints. Not a rare set but difficult to find in choice condition. Here it is. Lists at about \$150.00

- 398—INDIAN HEAD CENT 1869. Struck in Copper nickel from the regular dies and may properly be classified as a Trial Piece. Undoubtedly one of the rarest of mint errors and the only one known. Uncirculated. It is valued at \$750.00

- 450—(1952?) Nickel. Here's a most unusual and rare error. Obverse, at left we see the back of Jefferson's head with faint lettering IBERT and what seems to resemble 1952. At right (G)OD WE TR(UST). The reverse is equally remarkable. At left, part of monument with LO below it; at right, extreme left part of monument with U of UNITED below. Valued at \$250.00
- 451—Blank Nickel planchet, edge milled. 10.00
- 452—1911 Barber Dime, in copper. Very fine. Rare. 60.00
- 453—Roosevelt Dime. 1/3 off center to K4. LIBERTY. GOD, most of head show. Unc. 12.00

- 455—10c 1914(?) 20% O.C. K12. Uncirculated.
- 155a—25c 1911 Double struck obverse and reverse. Reading the obverse sounds like an echo. LLIBBEERRTTY 11991411 (that's the date.) The reverse is really a mess! Not only struck twice (at least) but not in the same place. In fact, it's such a comedy of errors, you should see it.
- 456—10c 1912 S Kolet 12. 1/10th off center only partially milled, halfway around and only on obverse part of coin. Uncirculated. Scarce.
- 457—QUARTER 1952 on Nickel Planchet (Weight 77.6 grams). Milled at bottom only. V.F., rare. \$150.00

- 162—50c 1951 on a DIME PLANCHET! This one really spread out. Most of Franklin, 1951. IN GOD WE T. struck up. The reverse has only an incused 19 and an incused JRS (John R. Sinnock who designed the Roosevelt Dime). Uncirculated, only one known. Valued at \$250.00
- 163—Brockage, Republic of China 10 Cash, Hunan Province. Obverse, normal; reverse, obverse incused. Scarce, 10.00
- 164—1921 Morgan type Silver Dollar, off center about 8%, blank at 11 o'clock, no reeding; together with the regular issue, which has a die break. Both unc. Accompanied by the bag tags showing that both were checked and counted by the same people at different times.

- 166—Silver Dollar 1881-S. Off-center about 10%, blank in 6 o'clock position; 60% of reeding missing. Uncirculated, 50.00
- 167—Silver Dollar 1881-O. 20% off-center; blank in 6 o'clock position. No reeding at all. Uncirculated, \$100.00
- 168—Silver Dollar, blank planchet. Scarce, \$125.00
- 169—HALF EAGLE and QUARTER EAGLE MILING. 1846. The obverse of an 1846 Half Eagle struck upon the reverse of an 1846 Quarter Eagle. This is not merely a combination of two obverse dies but an intentional overstrike, the reverse design of the quarter eagle being plainly seen. The quarter eagle obverse shows the effect of the second striking. Copper, reeded edge, muling of the obverses of AW102 and 103. Unique. From the 1952 ANA Auction; formerly in the Frank H. Stewart Collection.

LARGE CENTS

- 510—1793 Wreath Cent, S6, C7E. The sprung die variety. Popular and scarce, about a VF-20, \$125.00
- 511—1793 Liberty Cap, Sheldon 14, Crosby 13-L. The cracked die variety. Conservatively VF-20.
- 512—1794 S71, Hays 50, Chapman 55. Extremely fine, superior to Clarke specimen. There always seems to be a bit of wear on the hair on coins struck from the die. Hard to get better than VF, and this most certainly is better. Worth 75.00
- 513—1796 Liberty Cap S81 Gilbert D. Pole is attached to bust; double leaf under N. VF-30, not quite as good as the Dupont-Clarke coin which was about a 40 grade and fetched \$150.00

- 511—1796 Liberty Cap, S84, Gilbert D. A lustrous olive-brown beauty. AU-50. Worth \$300.00
- 515—1797 S139, D105, CN22. "R touches hair". (It's close but doesn't really touch). The heavy die crack is at left from rim to hair and another from the same point through curl to center of 1 in date. Engraver's lines from left stem almost to U and from right ribbon to fraction bar (again, almost). A very attractive olive-brown. About XF-10. Don't be misled by the "common" variety. In this condition it is a rare indeed. The Clarke coin was VF-20. Dupont's only an F-15. This lovely piece should bring a handsome price. \$100.00
- 516—1798 S152, D113, C10. The 98 over 97 variety. Fine-12. In demand. 17.50
- 517—1798 S187, D121, C47. Sharp, extremely fine 40 or better. Ex. Dr. French (#193). 50.00

- 518—1799 over 98. Sheldon 188. The famous over-date cent was formerly in the Dr. French Collection (#232) and is reputed to be the fourth finest known. The overdate is the rarer of the two varieties of the 1799 Cent and this VF-25 is indeed a prize worth owning. Certainly this coin will bring more than \$1,000.00
- 519—1803 S247, D182. The rare "Mumps" variety, not in Clarke Sale. This AU-50 is a delightful coin, sharp, well centered, with traces of original red. According to Dr. Sheldon's new condition consensus this would be the second finest known and worth a handsome price. \$175.00
- 520—1803 S251, D190 N9. Here's another "common variety" which will bring a price. The short fraction Bar; last S recut on right side. A lovely brown with just the hint of original red and mint bloom. This is one of the most attractive 1803 cents I have ever seen. Mint state, far superior to the Dupont coin which brought 85.00. Worth \$150.00
- 521—1801 S.266, the perfect die. Extremely fine, extremely rare, and in demand. A pleasant medium olive-brown, for the advance collector. Worth close to \$1,000.00
- 522—1805 S269, D201. The pointed 1, scarcer than the blunt 1 variety, ex. Dr. Sternberg Collection, superior to Clarke's. MS-60, olive-brown. \$175.00
- 523—1807 Perfect date. S276, D207, C6. Upset reverse. Fine-12. 10.00
- 521—1808 S279, C3. Thirteen star variety, VF-30. 10.00
- 525—1812 S290, D219, C3. Small date; a bit off-center obverse and reverse, VF-30. 30.00

526—1811 over 13. *Extremely rare, unlisted variety.* The plain 4. There is another specimen, in a well-known New York Collection, knowledge of which prompted the close scrutiny of the coin now being offered. An illustration would not suffice, the coin should be examined. It is sharp, cameo-like, with a dark even surface. A 50 or 55 grade and a prize for the advanced collector.

- 527—1816 N2. AU-50. 12.00
- 528—1816 AN 5. Ex. J. P. Young Collection AU-55. Small corrosion spots obverse and reverse. 20.00
- 529—1817 N9. A lustrous olive coin; sharp, proof-like. Has tiny edge bruise, otherwise MS-60. 35.00
- 530—1818 N10. MS-60. Purple and red. 12.50
- 531—1820 N12a. MS-60, tiny edge nick. ex-Sawicki Coll. 17.50
- 532—1820 N13. Common but attractive, olive-red-brown. 12.50

- 533—1823 N2. The perfect date, splendid olive-brown. Here's one out of the Clarke Collection which I overgraded. I had called it Mint State. Well, it sure is a beautiful coin but it's not mint state. The reverse is just about uncirculated, the obverse extremely fine. Call it a 45 grade and it will be most conservative. Clarke got it out of the Mehl Collection years ago at a cost of \$250.00. Worth a lot more today.
- 534—1824 N1. 1824 over 22. Very fine-30. 30.00
- 535—1824 N3. Uncommon. A lustrous brown, some red. AU-50. 70.00
- 536—1824 N4. Wide date. Light crack from 5th to 6th star; heavier crack from 4 through outside points of 11th, 12th and 13th stars. Mint state, medium brown with original red. The Uncirculated Clarke coin fetched 62.50
- 537—1825 N2, State II, with all the die cracks. Mint State-60, light olive; ex-Allenburger Collection. 40.00
- 538—1827 N1. A splendid olive-brown, some red and sharp. Out of the Pierce Collection. Just about like the Clarke piece which sold for \$55.00 and similar to the Dupont specimen (#651) which was sold as a proof for \$155.00
- 539—1827 N2. An attractive medium brown example of this very rare variety. Except for light abrasion on cheek and hair this coin is AU-50. Probably not more than 2 or 3 better ones known.
- 540—1827 N11. Uncirculated, light-olive-brown. 27.50
- 541—1828 N1. The small date, ex-Sheraton Coll. Olive-brown, proof-like. Scarce.
- 542—1828 N10. The Small Date Variety. Attractive Medium olive-brown, mint state. The Clarke Coin sold for \$75.00
- 543—1829 N6. Uncirculated, olive. Ex-Mehl Collection. The Clarke piece sold for \$15.00
- 544—1829 N8. LIBERTY recut: BE touch at top and base. TY touch at top. Diagonal lines in field between FA. VF-30. 10.00
- 545—1831 N3. Uncirculated, considerable red. 25.00
- 546—1833 N3. About uncirculated, rubbing on cheek, roughness in planchet behind head red-brown. 15.00

- 517—1831 N2½. Double profile. A little gem, light olive with mint lustre. Ex-Hines, Starr Collections. Scarce. 35.00
- 518—1831 N6. Large 8, low 3, die crack circles stars and date. Attractive mint state-60, olive surface, faint hint of red. Uncommon, not in Williams or Clarke. Dupont's VF fetched 17.50. Worth several times that figure.
- 519—1835 Type of 1834 N6. Popular type variety. AU-50 20.00
- 550—1835 Type of 1836 N16. VF-30. 7.00
- 551—1836 N3. Uncirculated, light olive, some red; has the obverse rim break. A most attractive coin. The Clarke piece sold for 10.00
- 552—1837 N3. Uncirculated. Mint red. Ex-Newcomb, Starr. 25.00
- 553—Another N3. Splendid olive gem. ex-Golding Coll. 27.50
- 554—1837 N7. Plain hair cord. Mint state, red-brown. 22.50

FRACTIONAL CURRENCY

Fractional Currency is literally a part of the unit of exchange, be it metallic, paper or of other material. Coins of denominations less than the unit, or in the United States, the dollar, are referred to as "minor coins." We are concerned with the Paper Fractional Currency issued between 1862 and 1876. The term "Fractional Currency" is popularly applied to this series although technically it is improper as we shall note below.

References used for cataloguing this collection were—Wayte Raymond, "U.S. Fractional Currency" referred to as R; Dr. Frank Limpert, "U.S. Postage Currency and Fractional Currency" referred to as L; Robert Friedberg "Paper Money of the U.S." referred to as F; and the first and foremost recognized work by D. W. Valentine on "Fractional Currency of the U.S." The latter is the result of the contributions of David Prosky, George H. Blake, Virgil Brand, H. R. Drowne, Robert Earl, Lyman H. Low and Fred C. C. Boyd. We are indebted to Mr. Boyd for the publication of that book as well as much valuable personal assistance. The consignor has been of great help.

It is with pride that we present as fine a collection of Fractional Currency as has appeared on the numismatic scene. We shall present the Regular Issues, the Essays and Experimental Pieces, the Grant and Sherman Specimens, Errors of the Regular Issues, Unsevered Pairs, Special Pieces, Proofs, in that order.

REGULAR ISSUES

First General Issue—August 21, 1862 to May 27, 1863

(Technically, these were really Postage Currency, not currency at all, but used as an expedient and were redeemable for postage although they could be used in payment of dues up to five dollars. There were 20 notes to a sheet.)

- 698—R1, V1a, F1228. 5 Cents, perforated. Facsimile of 5c stamp/monogram of American Bank Note Co. on reverse. (As has been the custom among collectors of this series, the reference numbers are frequently found in the corners of the reverse side.) New, faint crease in lower left corner. 17.50
- 699—R2, V2, F1210. 10 Cents, perforated. Washington on 10 stamp monogram. New. 15.00
- 700—R3, V3b, F1279. 25 Cents, perforated, monogram. Five 5c stamps. New. 25.00
- 701—R1, V1, F1310. 50 Cents, perforated, monogram. Five 10c stamps. New. 27.50
- 702—R1a, V1b. The extremely rare perforation 11 variety from the famous William F. Dunham and Charles M. Williams Collections. One sheet of 16 notes was issued with small perforations, 11 to 20 millimeters. This well-centered corner note has wide margins attached on two sides and is perhaps the finest of the few known to exist today. It cost the owner \$210.00 when I sold the Williams Collection. Worth a lot more today, now that the series is becoming more popular.
- 703—R5, V5, F1230. 5c, straight edges, monogram. New. 6.00
- 704—R6, V6, F1212. 10c, straight edge, monogram. 6.00
- 705—R7, V7d, F1281. 25c, similar. New. 10.00
- 706—R8, V8, F1312. 50c, similar. 17.50
- 707—R9, V9, F1229. 5c, Perforated, without monogram. New. 17.50
- 708—R10, V10a, F1244. 10c, similar. New. 17.50
- 709—R11, V11a, F1230. 25c, similar. New. 25.00
- 710—R12, V12a, F1311. 50c, similar. New. 35.00
- 711—R13, V13, F1231. 5c, Straight edges, no monogram. New. 20.00
- 712—R14, V11b, F1213. 10c, similar. New. 27.50
- 713—R15, V15, F1232. 25c, similar. New, rare. 15.00
- 714—R16, V16, F1313. 50c, similar. New. This is a highly undervalued item, seldom offered. Worth 75.00

Second General Issue—

October 10, 1863 to February 23, 1867

(All have the bust of Washington in a bronze oval frame. The value is surcharged in bronze on back. There were 20 notes to a sheet.)

- 715—R17, V17, F1232. New. 5.00
- 716—R18, V18, F1244. New. 5.00
- 717—R19, V19, F1283. New. 6.50
- 718—Valentine 19E, unlisted by Raymond. Same as #19 above but the obverse has a bronze surcharge TREAS. DEPT. in a bronze frame. These were made for the government and the surcharge was the distinguishing mark. All of the notes were supposed to have been destroyed as imperfect and seldom appear on the market. Very rare and could attract a runaway price. New.
- 719—R20, V20, F1314. 50 Cents, value only surcharged on back. An important rarity of long standing, seldom offered. This new, crisp, specimen is out of the Barney Bluestone Auction of April 27, 1915 and has old records to \$520.00. Worth a lot more today.
- 720—R21, V21, F1233. 5 Cents, similar, but 1863 surcharged on reverse, lower corners. New. 6.50
- 721—R21a, V25b, F1234. As above but S surcharged upper left corner of reverse. New. 7.50
- 722—R22, V22, F1245. 10 Cents, 1863 surcharged. Only very fine. 3.50 (a new one is valued at 6.50)
- 723—R22a, V26, F1246. Similar but with S. New. 7.50
- 724—R22b, V30, F1247. No S, but 1 surcharged upper right corner. New. 12.50
- 725—R22c, V33, F1248. 10 cents. The 1863 in lower corners is omitted. However, in the upper left is an "O" and at upper right "63". This is the only denomination known with the reverse surcharge in the upper corners and none in the lower corners. Supposedly on 2 sheets of 20 notes each were issued, many of which have undoubtedly been destroyed or lost. This elusive, crisp item is seldom offered. It cost \$250.00 in 1951, today worth about \$500.00
- 726—R23, V23, F1284. 25c, 1863 lower corners. A bit off-center on reverse and part of the note on the left is evident (mint-error?). 10.00
- 727—R23a, V27, F1286. Similar but with S, upper left. New. 7.50
- 728—R23, V27h, F1285. Similar but an A instead of S upper left. New. 7.50
- 729—R23c, V31, F1288. 25c, 1863 lower corners, at upper right. New. A lot scarcer than realized. Worth 25.00
- 730—R24, V24, F1316. 50c, 1863 lower corners. Crisp, apparently laundered. 8.00 (A new specimen is valued at 12.50).
- 731—R24a, V28, F1317. Similar but an A at upper left. New. 11.00
- 732—R24b, V32, F1318. 1863, 1 upper right. New. 11.00
- 733—R24c, V32b, F1319. We are presented with a dilemma. All references describe this note, 50c, 1863 in lower corners, S upper left, 2 upper right. Valentine calls it no. 32b. Very likely Raymond used some of this material in preparing his lists and Friedberg obviously did the same. Current opinion among several leading collectors is that this listing is erroneous and that there is no 2 at upper right. If these collectors are right then the item now offered is R24c, etc. It has 1863, with S at upper left, but no 2 at upper right. In this instance it is an extremely rare piece. If our reference writers are correct and there is such an item as R24c, etc. with the 2 at upper right then we have even a greater rarity, unlisted by anyone. Our good friend, Dr. Limpert goes along with the experts

listing his# B8-h as having the 2. This choice rarity has a tiny crease upper left corner. The red plate no. 121 is on reverse. Should bring a runaway price.

731—R 25, V 31, F 1235. 5c Fibre Paper. R 1 1863 surcharge on reverse. New, scarce; an underrated piece. Worth 10.00

735—R 26, V 35, F1249. 10c. T 1 1863 surcharges. Fibre paper. Very fine. 20.00 (a new specimen would be valued at 40.00).

736—R 27, V 36, F1239. 25c Fibre paper. T 1 1863. New 30.00

737—R 27a, V 36c, F1290. Similar but T2, 1863. Extremely fine. 20.00

738—R 28, V 37, F1320. 50c Fibre paper. O 1 1863. New. 37.50

739—R 28a, V 37b, F1321. Similar. R 2 1863. Crisp. 37.50

740—R 28b, V 37d, F1322. Similar. T1 1863. New. 37.50

Third General Issue—

Dec. 5, 1864 to Aug. 16, 1869

(The increased demand for fractional currency and the number of counterfeits of the second issue made a new design advisable. Here are a few interesting facts about the 3rd issue. The 3 cents denomination was introduced in sheets of 25 and is the only issue of that denomination. Congress provided for the coinage of a 3 cents coin in nickel and the paper was not needed. The 5 cent note, issued in sheets of 20, bears the portrait of S. M. Clark, Superintendent of the National Currency Bureau. This so stirred Congress that an act was passed on April 7, 1866 prohibiting the portrait of any living person to appear on any notes or bonds. The 10 cent note does not have the word "cents" on it. A 15 cent note was contemplated for this issue but was never authorized. It exists only in proof on separate obverse and reverse. "Location Marks" appear for the first time. A small "a" or "l" indicate the left edge note or upper edge note of a sheet. No other notes on a sheet have either the letter or number.)

741—R 29, V 38, F1227. 3c green back. dark background to portrait of Washington. New. 9.00

742—R 30, V 38b, F1226. Same but light background. New. 7.00

743—R 31, V 39, F1238. 5c green back. Clark Portrait caused change in law). New. 7.00

744—R 31a, V 39b, F1239. Same but small "a" on obverse. New. 10.00

745—R 32, V 40, F1255. 10c, Washington. green back. (Issued in sheets of 16). New. 7.00

746—R 32a, V 40c, F1256. Same, but small "l" on obverse. new. 10.00

ERRORS OF REGULAR ISSUE

During the production of this currency, many errors appeared, some of which found their way into circulation. Inverted reverses occur in notes of the first three issues, as well as inverted reverse surcharges in the second and third issues. Some notes of the third issue, autographic signatures, are known but with one signature; some exist completely unsigned. In the fourth issue, some notes bear a purplish brown seal, instead of the regular carmine color.

In the first regular issue, postage currency, notes having inverted backs probably are the outstanding rarities and were produced by the printer putting a sheet already printed on one side, into the press in an inverted position.

- 849—Valentine 5D—Five Cents postage currency, imperforated, with Monogram ABNCO on reverse, reverse inverted. A nice uncirculated note from Dallas Ana convention sale.
- 850—Valentine 9C—Five Cents postage currency, perforated, without ABNCO Monogram on reverse, reverse inverted. Not known to Dr. Limpert; obtained at ANA auction sale Omaha 1955. Well-centered, a bright uncirculated copy, only one seen by owner. Should bring spirited bidding among specialists in this series.
- 851—Valentine 6B—Ten Cents postage currency, imperforated, with Monogram ABNCO. Reverse inverted. Crisp unc., a nice specimen of considerable rarity.
- 852—Limpert A2-N Ten Cents postage currency perforated edges, without Monogram ABNCO! Not known to Valentine, unquestionably very rare. A very fine note and highly desirable, has one thin spot.
- 853—Valentine 7B—Twenty-Five Cents postage currency, imperf. With Monogram ABNCO from Limpert collection. Very good and very rare.

Second issue notes also appear with completely inverted reverses, and also with the bronze corner and value surcharges upside down, providing interesting variations for the specialist.

- 851—Val. 22B—Ten Cents Washington, second issue, with reverse surcharges inverted! Many times rarer than a Panama-Pacific set, this crisp unc. note should excite spirited bidding, as should all these rare errors.
- 855—Val. 26C—Ten Cents Washington, with reverse surcharges "S-18-63" inverted. Crisp unc. and desirable, at least as rare as preceding. (Cost \$200. in 1951)
- 856—Unlisted—Twenty-Five Cents, second issue, reverse surcharged "S-18-63." 18-63 normal, S inverted! Owner knows of only one other such note. For the specialist desiring the unusual this very fine specimen should be a MUST!
- 857—Friedberg 1283-A—Twenty-Five Cents Washington surcharged only "63" in lower right reverse corner, the figures "18" missing from lower left. According to Friedberg, a hundred dollar note! Crisp unc.
- 858—Valentine 32A—Fifty Cents Washington, reverse surcharges "1-18-63," reverse completely inverted! This extremely fine and rarely encountered item, is from B. G. Johnson, famous old St. Louis dealer.

The remarks accompanying the second issue also apply to the third issue, regarding inverts. In addition the omission of Gen. Spinner's signature in the autographic series did occur and Mr. Colby's autograph missing has also been reported; all are great rarities. In addition, occasional notes exist minus the bronze value surcharges.

- 859—Limpert C9-J—Three Cents Washington, light curtain. A minor variety, described in the numismatist of 1893 as follows: "As part of the frame below the portrait and above the letter L, there is a small diamond—shaped ornament, below which are two circles or pearls. A variety or rarity does not show the small circles or pearls." Crisp unc., An interesting variation.
- 860—Valentine 39A—Five Cents Clark, third issue, green back, with inverted reverse, from Dr. Limperts collection. Very rare and unusual.
- 861—Valentine 10C—Ten Cents Washington, third issue, green back, both obverse and reverse surcharges missing! Dr. Limpert obtained this note from an Antiquarian in Jackson, Georgia years ago, paying \$100. A rare opportunity, crisp unc.
- 862—Valentine 10E—Ten Cents Washington, third issue, green back, with both obverse and reverse surcharges inverted! A wonderful example of a rare error of which only four are said to exist! Crisp unc., with nice margins.
- 863—Limpert C12-H—Twenty-Five Cents Fessenden, green back; reverse surcharge is inverted. From H. K. Crofoot of Moravia, New York, unlisted by Valentine. Crisp unc., and seldom seen.
- 864—Valentine 12-X—Fifty Cent Justice, green back, design numeral 1. Reverse surcharge A-265 inverted! Ex. rare, the only one to appear in years. Possibly unique, listed but not seen by Valentine.
- 865—Valentine 13-V—Fifty Cents Spinner, green back, variety with figure 1 and letter A on obverse, reverse value surcharge inverted! All fractional currency specialists should vie for this note, as no invert could be rarer. It is eleven times rarer than any other from the same sheet! Fine condition and nice appearance.
- 866—Limpert C14-B—Fifty Cents Spinner, red reverse, hand autographed by Gen. Spinner only, the left space, which normally bears the signature of Mr. Colby being blank! One of the most interesting types of errors. Ex. rare and Ex. fine, despite a few reverse smudges.

- 887—R 23b, V 27h, F1285 25c Second issue. Block of 4 notes, about extremely fine.

NON-COLLECTABLE BRISTOL BOARDS

- 927a—One of only two known sets of Fractional Currency Proofs on Bristol Board. These rarities should not be confused with the photographic reproductions cut from Heath's book on Counterfeit Detectors. This set of 7 pieces has an interesting pedigree. It was originally owned by F. E. Spinner, Treasurer of the United States, went to Francis Elias Spinner Harvey, his grandson and then to that well known collector H. K. Crofoot of Moravia, N.Y. from whom the present owner acquired it. The second set is the one from the Thomas Cunningham Collection now owned by Mr. Crofoot. The seven pieces are (1) 10c reverse of second issue (Valentine #81), (2) 50c reverse, second issue (V. 82), (3) 5c reverse, third issue (V. 83), (4) 10c reverse third issue (V84), (5) 50c reverse old style, third issue (V195), (6) 50c obverse, third issue, Spinner portrait and autograph of Spinner, without register's name. Only 2 known to exist, (7) 50c reverse new style, third issue (V196). Should bring a runaway price. I know I will be asked for an estimate. It's hard to say but certainly should go for more than \$2,000.00
- 927b—Sheet of 12 notes in frame; the 25c Postage Currency. Pretty well worn notes but scarce in sheet form. Ex-Grunell Collection.
- 928—VIGNETTES. A handsome set of 6 vignettes which appear on fractional currency. They are of Washington, Merideth, Walker, Crawford, Stanton and Dexter. These are interesting and complement a display of fractional currency to advantage.

929—LEATHERETTE PURSE used for carrying Fractional Currency. There are four sections, thumb indexed 5, 10, 25, 50. A most interesting contemporary item for the Collector of Fractionals.

930—10 Cent Postage Currency, 1863, struck in aluminum, AW 381, (Judd).

931—10 Cent Postage Currency 1863, struck in copper, AW 381, (Judd).

Because of the importance of this offering of FRACTIONAL CURRENCY, we will prepare a special edition, after the sale, which will feature the complete descriptions and prices realized.

The book will be especially bound as a Library Edition and personalized with your name in gold. Price about \$7.50, by advance subscription only. Mark your BID SHEET.

SILVER DOLLARS OF THE WORLD

- 1282—Collection of 150 coins, mostly Dollar Size, of the World. Most of the coins are uncirculated or extremely fine, some very fine, only very few below that grade. The estimate is based on a personal examination of each coin and represents a true market value. Only a few duplicates. Considering the time it would take to accumulate such a variety and representation, this lot should bring well over \$100.00.

EXTRAORDINARY COLLECTION OF MARRIAGE MEDALS

1287—This splendid collection is to be sold intact. It represents a pursuit of many years through many lands. The consignor has accumulated many foreign reference works to assist him in cataloging all of the coins and medals in the collection.

Reasons of health prevent him from building on the foundation of 407 pieces. He would like someone to continue his work, hence the offering in bulk.

The reference works will go to the buyer of the collection. In addition the consignor has prepared a manuscript describing all of the medals and coins in the collection fully; obverse and reverse descriptions, attributions and comparative prices when available are noted. This manuscript together with the copyright privileges will also be awarded to the buyer of the collection. Starting with 1479, representing almost all European countries, the collection is rich in Holy Roman Empire and 17th Century material. Possibly 150 to 200 pieces have never been offered in U. S. publications. There are 312 pieces in silver, 75 in bronze, 12 in gold, 3 white metal and 5 silver and gold plated. Each represents a little bit of history—A royal marriage resulting in an alliance between nations or perhaps 2 countries avoided a war as a prince and princess were wed. There has been an outlay of \$4300.00 for the coins and medals. In addition there are the reference works and finally the descriptive catalogue and copyrights. I should like to see this collection go to one who will build it further. Should bring over \$5,000.00.

THIRD SESSION TOMORROW — 7:00 P. M.

1958 ANA CONVENTION SALE

Part 3 - Friday August 15, 7:00 P. M.

UNITED STATES PATTERNS TRIAL AND EXPERIMENTAL PIECES

Here is a most extraordinary series. In a coinage lacking the variety and artistic efforts common to ancient and foreign coins, the United States mint efforts offer the great variety characteristic of the Patterns, Trial and Experimental Pieces. Numismatists have adopted that scheme of collecting which incorporates into their series the patterns of that series; that is, the Collector of Half Dollars acquires a variety of pattern half dollars, etc. This tends to create a new and increased interest because of the introduction of so many different and attractive designs. It actually broadens the scope and enhances the enjoyment of collecting. The first session of this auction offered a splendid type collection which was put together in this fashion and this procedure is recommended to you.

The Pattern Series has always been a favorite of this cataloguer's and it has been a pleasure to work with Dr. J. Hewitt Judd who has finally completed his work on the new book which will become the standard work on the series. The old Adams-Woodin book has served its purpose since 1913 despite the many errors of omission and commission. Now the Judd work has corrected these errors.

The book will be published by the Whitman Publishing Co. this fall. The items will be priced. Much of the pricing has been completed and the lots in this sale reflect the proposed list prices. However, with such a splendid offering as this one coming up it was deemed advisable to bring all prices up to date after this auction sale has been completed. This will be done. The reference numbers below are J for Judd and AW for Adams Woodin. This will give collectors an opportunity to start converting their A-W numbers to Judd numbers. When the book is released, the complete record will be available.

WASS MOLITOR GEM

- 1660—\$50.00 Round "slug" 1855 issued by Wass Molitor and Company of San Francisco. This beauty is the Earle Specimen (1912 Chapman Sale). went to Virgil Brand. then to Frank Smith. The Earle Catalogue

listed it as "The Finest Specimen Known." which is pretty strong, but then the coin is as nice as one has a right to expect. It should bring a really fancy figure. \$8,000.00

\$50.00 OCTAGONAL SLUG

- 1661—\$50.00 1851 United States Assay Office of Gold, San Francisco, California. 887 THOUS. variety. Target center reverse. Reeded edge. About fine. all lettering clear with only a slight weakness at U in UNITED. This would make a handsome memento of California as the territorial octagonal "slug" is unique in the respect that only in California was it minted. In special plastic holder. Popular. should bring over \$1,000.00

COMMEMORATIVE GOLD

- 1662—1915. \$50.00 gold. the rare round \$50.00 piece of which only 133 were minted and a lot of these were used as pocket pieces at the time. Uncirculated. very rare. Lists at \$2,200.00
 1663—1915. \$50.00 gold. the octagonal \$50.00 piece of which only 645 were made. These were popular as pocket piece because of the odd shape. This Uncirculated beauty lists at \$1,350.00

- 1664—SET of 11 Commemorative gold coins includes the 9 gold dollars and the 2 quarter eagles. All uncirculated except the 1901 which had a loop removed. The Uncirculated Set sells for \$850.00. this set worth \$750.00

 1675—Incomplete Set 1903 Jefferson. 1903 McKinley. 1905 Lewis & Clarke. 1915 Panama Pacific. 1916 McKinley. 1922 Grant without star. plus the Sesqui-centennial quarter eagle. 7 Uncirculated coins. \$495.00

QUINTUPLE STELLA

1676—1879 \$20.00 Gold. Liberty head; regular reverse. Proof. It is referred to as the Quintuple Stella because the obverse inscription is similar to that used on the Stella; 30 G 1.5S 3.5 C 35 G R A M S 1879. There are 13 stars separating 30 star G star 1.5 star etc. 3 or 4 pieces struck.

This great rarity of the double eagle series should bring a record price, conceivably approaching the five figure mark. It is ever so much rarer than the pattern 20.00 1907 St. Gauden's very high relief for which I paid \$9,250.00 at the 1956 Chicago ANA

Convention Auction. There are 16 of those—probably only 3 of these. With the popularity of gold patterns ever on the increase, this piece should be acquired now. These rarities being bought up by foundations and institutions—perhaps never to come on the open market again.

1677—The same rarity. 1879 Quintuple Stella struck in Copper. I was going to say “for the champagne taste—etc.” except that a beer pocket-book won't buy this. Proof. Should bring over \$500.00

SILVER DOLLARS

1678—1794 Uncirculated. Head of Liberty right, flowing hair with eight stars behind and seven stars facing. LIBERTY above and 1794 below; reverse, small eagle in wreath, UNITED STATES OF AMERICA. Edge lettered ONE DOLLAR OR ONE HUNDRED CENTS. There is only one die known of the 1794 Dollar; the date is the first of the issue and the

rarest of the series. In this magnificent state of preservation it is all but unique.

If this description sounds like the one in the World's Greatest Collection—it should. It's the same coin. I shall state without equivocation that this specimen is superior to the one which fetched \$8,000.00 at the 1956 Chicago Convention Sale. This is the specimen for a top collection. Should start at five figures.

GOBRECHT DOLLAR

- 1679—1836. Silver Dollar. C. GOBRECHT on base. Flying eagle of stars, plain edge. Superb proof. \$800.00
1681—1836. Silver Dollar. C. GOBRECHT on base/Eagle in field of stars, plain edge. Very good to fine. \$250.00
1682—Another, good. \$175.00

LIBERTY SEATED DOLLARS — PROOFS

This group has a sufficient number of uncirculated pieces so that it is advisable to break it into 2 lots, the proofs in one group, the others in a second.

I beg your indulgence in this matter. This is an opportune moment to explain that there may be a few changes made in the final numbers as well as in the final figures depending on the results of this auction sale.)

SPECIAL NOTICE—In the event that time does not permit the completion of the third session tonight, arrangements have been made to sell the final 200 lots or so on Saturday afternoon at 1:30 p.m.

1915—\$4.00 Gold 1880 Flowing Hair. one of the 3 rare varieties of the popular Stella. The theory was that a \$4.00 denomination would assist our foreign trade, corresponding as it would to Latin Monetary System used by many nations. The Flowing Hair and Coiled Hair varieties were both struck in 1879 and 1880 with the 1879 flowing hair the comparatively common one—the other 3 are all very rare. It would not surprise me to see the coin bring well over \$5,000.00 This beauty is from the William H. Woodin Collection.

BLIND MAN'S NICKEL

1964—The Famous 1882 "Blind Man's Nickel." J1651. not listed by Adams-Woodin. The obverse design is that of the shield type nickel of 1866; the reverse same as the shield type of 1883. There are bars on the edge which would identify the coin by feel. This beauty is out of the Col. Curtis Collection and cost \$750.00 several years ago. A recent sales catalogue compared this coin to the 1913 Nickel and gave a

whole page to the description. (If I don't watch out, this will stretch to a page as well!). The cataloguer indicated that this idea was limited to three specimens. Housed in a special plastic holder.

FOR TERRITORIAL GOLD

2017

2018

2017—Incused impression in lead of the obverse of United States Assay Office \$20.00 gold of 1853, 900 thous. variety. Uniface. Probably unique. Excellent condition.

2018—Trial piece of the reverse of the \$20.00 United States Assay Office coin of 1853, with a target design on the other side. Struck on lead, octagonal shaped. Said to be unique; uncirculated.

2019

2019—Trial piece of the reverse of the \$20.00 United States Assay Office coin of 1853 on a thick, large round copper planchet. Uniface. In excellent condition. Extremely rare.

2020

2020—Here's a prize! A silver ingot about 1 1/2" x 15/16", somewhat rectangular in shape on which was tried the die for either a \$10.00 gold piece of Augustus Humbert in 1851 or it may have been intended for the \$20.00 gold piece. In fact the 1852 over 1

\$20.00 coin issued by Augustus Humbert may very well have used this die by recutting a 2 over the 1. Comparison favors the latter thought, besides we know that there is a \$20.00 gold 1852 over 1 but no coins of either the \$10.00 or \$20.00 denominations of 1851 were issued by Humbert. Indications are that there were 3, possibly 4 strikings on this planchet. Probably unique.

PAQUET PIECES

2021

2022

(The work of Anthony C. Paquet)

2021—1857. Pattern for (reverses) half dollar, quarter and half dime (?) on one tin planchet. Concentric circles. Uniface.

2021—Trial Piece of the Paquet Reverse for the \$20.00 gold of 1861 (compare AW320). Struck in tin, uniface. An extremely important piece, as are all of Paquet's works. It is well to keep in mind that this reverse was used on the \$20.00 coinage of 1861 and 1861-S as regularly authorized issues. I have never seen this piece published.

2025

2025—Pattern of the Paquet Reverse proposed for the Double Eagle of 1859 (See AW321). Struck in tin. The Woodlin Collection had one in white metal Uniface.

BARBER PIECES

2032—Section showing incomplete reverse of the 1877 fifty dollar gold piece, uniface, incused in lead; Eagle and rays, scroll but no lettering. Probably unique.

Still in Mr. Mehl's envelope and marked "Do not sell. Proof."

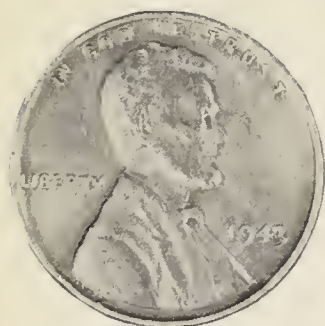

Before comments are made about the illustrations of these rarities—remember, the items are trials unfinished patterns, shallow discs, etc. We reproduce them because not to do so would be short-sighted.

1943 COPPER CENT

(twice actual size)

2055—About 18 months ago, a gentleman approached me with a cent dated 1943. It looked like copper but was in a plastic holder. Well, dealers have bothered with "1943 Copper Cents" by the score. My skepticism must have been evident. On several occasions, Mr. Marvin Beyer tried to get me interested. Finally, I told him I wouldn't touch it until various tests had been made. These would

require time and expense. I thought I had discouraged him.

Several months ago, at a local convention, Mr. Beyer came to me with the results of his efforts. He had established the possibility of a Copper Cent of 1943 having been minted. He had a Specific Gravity test made by the Atlas Testing Laboratories, Inc., Chemists, Metallurgists and Specialists in Industrial X-Ray. Comparison of a 1942 Cent with the 1943 Cent indicated specific gravities of 8.51 and 8.59 respectively.

A Norelco X-Ray Spectrograph analysis made by the same company compared a 1936 Cent with the 1943 Cent. The reproduced report graphically indicates the comparative copper content. Thus far, Mr. Beyer had established that the Specific Gravity and Copper Content were in order. Now, the authenticity of the date must be checked.

The Ferro-Spec Laboratories Inc. Radiographed the coin and their report on the Copper Cent is that there is no evidence of a weldment. Their report is reproduced. The actual film cannot be reproduced but is available and no experienced eye is necessary to see that the date is genuine.

Now, I have been cautioned by many well-wishing friends and associates not to "stick my neck out" on this coin. Remember, I was as skeptical as anyone. But in the face of all these tests, I ask, "Is it possible to have a silver cent of 1943? We know there are such things. Why not a copper cent? Does a copper cent require more special dispensation than one struck in silver?"

This catalogue features many Mint Errors, some as fantastic as this one so that the wonder of it should be no wonder at all. The fact is that the 1943 Copper Cent has captured the imagination of the whole fraternity of collectors — yes, even beyond that it has reached the general public. All sorts of rumors surround this coin. An Automobile Company would give a car — a home fully furnished would be traded for the Cent. These are rumors, of course. However, Mr. Beyer has stated that he was offered \$25,000.00 cash for the coin and, in fact, Mr. Beyer introduced me to the gentleman who allegedly made the offer. I say allegedly because I did not confirm this offer.

Here you have it — The coin, the tests, the story. As one editor of a numismatic paper put it — it's the find of the Century.

On the following pages you will find the reproduced reports of

1) Atlas testing laboratories for Specific Gravity Comparison.

2) Norelco X-Ray Spectrograph for comparative copper content.

3) Ferro-Spec Laboratories Radiograph for weldment.
